

INTRODUCING THE ALL-NEW TICO PRO-SPOTTER ELECTRIC

As the leading terminal tractor manufacturer with unique, real-world experience in fleet operations, TICO has partnered with Volvo Penta to bring you the all-new TICO Pro-Spotter electric terminal tractor.

1

Batteries Mounted Inside of Frame Rails

Designed with 132 kWh total onboard energy to give you peak protection and easy change for multiple life cycles.

2

Industry-Leading Power

The Volvo 2-speed gearbox allows for elite unit performance, gradeability, and drivability.

3

Volvo Active Thermal Management System

The TICO Pro-Spotter Electric performs in all climates delivering constant optimal battery temperature.

4

Unprecedented Comfort & Experience

With flush grating for ergonomic trailer moves, the TICO Pro-Spotter Electric delivers smooth driving and minimal noise.

TICO ELECTRIC

5

Touch Screen LCD Gauge Display

Enjoy an unrivaled interactive operator and maintenance-friendly display at your fingertips.

6

No Proprietary Charging Required

Primed for opportunity charging, full battery can be achieved within just 45 minutes at 150 kW DC fast charge.

7

TICO Edge & Uptime Service Platforms

For service events, the TICO Edge QR code links to the EDGE platform and EDGE Connect telematics—keeping your team connected to the TICO Uptime Center and vehicle health.

8

Standard TICO Key Features

Composite cab, air-operated rear doors, continuously welded frame, heavy-duty boxed 5th boom, all-steel dash and more.

The latest of TICO's innovations, the TICO Pro-Spotter electric combines the power and durability of Pro-Spotter trucks with the design, reliability, and components of the Volvo Group. This means industry-leading equipment and technology, backed by a real-time service management platform, integrated battery monitoring service, and dedicated support to keep fleet operators on the move.
